Jennifer Plaza

Front-End Web Developer

PROFILE

A new Full Sail graduate with an undergrad in Web Design and Development. I have currently taken several courses on semantic design in front-end web development, to learn how to enhance user interaction. I am eager to put what I've learned into practice. I look forward to using these skills to analyze, enhance your website and meet your future goals.

WORK EXPERIENCE

2010 - 2012
MARKETING COORD

American Hotel & Lodging Educational Institute, Orlando
• Achieved budget goals by establishing purchases and booth rentals.
• Streamlined processes to improve tradeshow booth scheduling, rental, and/or purchases to meet vendor and conf. requirements.
• Enhanced communications processes with sales managers and coordinators to purchase tradeshow giveaways.
• Supported quality control for marketing collateral.

2013 - 2017
IT COORD

American Hotel & Lodging Educational Institute, Orlando
• Fast learner with the ability to plan ahead and proactively provide solutions. Very optimistic and able to work individually and in a team setting.
• Supported four online platforms to improve helpdesk and content delivery.
• Streamlined, resolved, and implemented operational procedures to ensure operational performance.
• Knowledgeable in establishing workflow processes in facilitating operational procedures in SharePoint and Salesforce.
• Proficient in maintaining website content, using Ektron.

2017 - 2020
STUDENT

FULL SAIL UNIVERSITY, Orlando
• Knowledgeable experience in C# creating small functional assignments using arrays, conditionals, loops, classes & objects, and finally using design pattern MVC.
• Developed proficient experience in performing tasks such as updating or retrieving database data.
• Designed application, Right for U , Simple Budgets, and Made Easy 4 Me, with Adobe XD using emerging patterns in interface design. Projects involved researching competitive brands, creating word and site maps, lo and hi wireframes adhering to mobile first mindset, a style guide and mockups demonstrating visual consistency and organizational principles. Project development was documented using Adobe Spark Page; https://spark.adobe.com/page/ghGkaQSP27NZD/ & https://spark.adobe.com/page/oGjZ3wTTAJxHq/. Project prototype was published using Invision; https://invis.io/N4WHWNQ9PYT#/410090193_Home
• Designed and developed web applications using JavaScript. Semantic formats were implemented, for HTML and CSS. Node.js, React, and different libraries including Reveal, Bootstrap, and Material UI were introduced in creating user interfaces; Faith Specialty Plates, Parks2Go, The Cycle Bike Shop, Music and Supplies contact form, Pay It Forward, and Post It, all showcased on https://jenplaza.github.io/portfolio/.
• Efficient experience using GitHub project boards; implementing agile project mgmt.
